INDEX

Activity, Microtus, photographic recording, 231-249
Age-class distribution, old-growth forest, 140-142
Age structure, in island salamander populations, 371-372
Alaska, lakes, primary productivity, 207-230
Anderson, P. K., article, 359-385
Aneides lugubris, variation, 379-380

Batrachoseps attenuatus, variation in, 377-379
Beach, N. W., article, 339-357

California, Microtus activity, 231-249
  pebble crabs, ecology, 165-185
Climax, interpretation, Siskiyou Mts., 306-311
  edaphic, 306-307
Commensalism, in pebble crabs, 182-183
Community, energy dynamics, 187-206
Cooper, C. F., article, 129-164
Coral reefs, food habits of fish fauna, 71-114
Curtis, J. T., article, 1-35

Density, in island salamander populations, 367-370
Diameter-class distribution, old-growth forest, 139-140
Dispersion, population, Western spotted frog, 265-267

Edaphic climaxes, 306-307
Emigration, Western spotted frog, 271-273
Energy dynamics, old-field community, 187-206

Family associations, in Microtus, 247-248
Fire, and ponderosa pine, 137-138, 150-151, 153-156
  Siskiyou Mts., 306-307
Flood plains, development, 41-43
  forest, 45-49
  marshes, 52-56
  soils, 43-45
  swamps, 49-52
  wet lands, 56-58
Food-chain, old-field community, 187-206
Food habits, California pebble crabs, 180-181
  coral reef fishes, 71-114
Food web, in coral reef fish fauna, 126
Formations, 311-316
Freeze response, pebble crabs, 173-175
Frog, Western spotted, population dynamics, 251-278

Goldman, C. R., article, 207-230
Golley, F. B., article, 187-206
Gradient analysis, 286-291
  transect techniques, 286-291
Grazing and pine forests, 134-136
Great Lake region, boreal conifer—hardwood forests, 1-35
  climate, 4
  postglacial history, 4
  soils, 3-4
Growth rate, Western spotted frog, 254-259

Habitats, California pebble crabs, 167-172
  coral reef fishes, 114-120
Habitat selection, in Peromyscus, 394-403
Hiatt, R. W., article, 65-127
Home range, Microtus, 244-246
  Western spotted frog, 273-275

Indicators, of serpentine, 328-329
Insolation, old-field community, 193-194
Interspecific association, in Peromyscus, 395-396
Island ecology and evolution, in salamanders, 359-385

Klein, H. G., article, 387-407
Knudsen, J. W., article, 165-185

Lakes, Alaska, primary productivity, 207-230
Life-forms, 317-319
Limiting factors, in Alaska lakes, 207-230
Locomotion, pebble crabs, 172
Longevity, Microtus, 243-244

Marshall Islands, fish fauna of coral reefs, 65-127
Marshes, 52-56
Maycock, P. F., article, 1-35
Michigan, old-field community, energy dynamics, 187-206
Microtus californicus, activity in runways, 231-249
Microtus pennsylvanicus, energy dynamics, 196-202
Moisture gradient ordination, 10-19
Mortality, Western spotted frog, causes, 262-265
Mustela rixosa, energy dynamics, 202-203

Old-field community, energy relations, 187-206
Ordination, techniques, 7-30
  environmental factors, 30
  moisture gradient, 10-19
  three-dimensional, 21-23

Parasitism, on pebble crabs, 181
Pattern, in ponderosa pine forest, 148-150
  origin of, 157-158
Pearson, O. P., article, 231-249
Pebble crabs, ecology, 165-185
  commensalism, 182-183
Peromyscus leucopus, ecology, in central New York, 387-407
Permyscus maniculatus, ecology, in central New York, 387-407
Photographic recording, of Microtus activity, 231-249
Phytosociology, boreal conifer—hardwood forest, 1-35
Pine forest, effects of man, 129-164
Pinus ponderosa forest, effects of man, 129-164
  effects of fire, 137-138
  effects of grazing, 134-136
  pattern, 148-150
  structure, 157-158
Planktonic rotifers, of Oequeoc River, Michigan, 339-357
Ponderosa pine, dominance, suppression, mortality, 145-147
  age-class distributions, 140-142
  age-classes of reproduction stands, 143-145
  diameter class distribution, 142-143

INDEX

Activity, Microtus, photographic recording, 231-249
Age-class distribution, old-growth forest, 140-142
